DECENTRALIZED PLATFORM FOR EARNING BNB

ABOUT BNB BRO

BNB BRO – is a revolutionary platform created to unite people using decentralized technologies. We offer a secure, transparent, and simple ecosystem for earning BNB.

Key Values:

Trust

Transparency

Security

Decentralization

WHY BNB?

1 BNB = 600 USDT

BNB – is the key cryptocurrency of the BNB Chain ecosystem, providing access to decentralized applications (dApps), staking, and other opportunities.

BNB BRO uses BNB as the primary currency for all transactions, integrating the platform into the Binance ecosystem.

What is a DApp?

A DApp (decentralized application) runs on a blockchain, ensuring transparency and security without centralized control.

BNB BRO DApp allows:

- 1 Interact with the Binance Smart Chain blockchain
- 2 Earn BNB as a reward
- 3 Participate in a decentralized ecosystem

WHAT IS X9 MATRIX INCOME?

X9 MATRIX INCOME – is a 12-slot matrix system that enables you to earn money by filling the lower slots with new participants in the system.

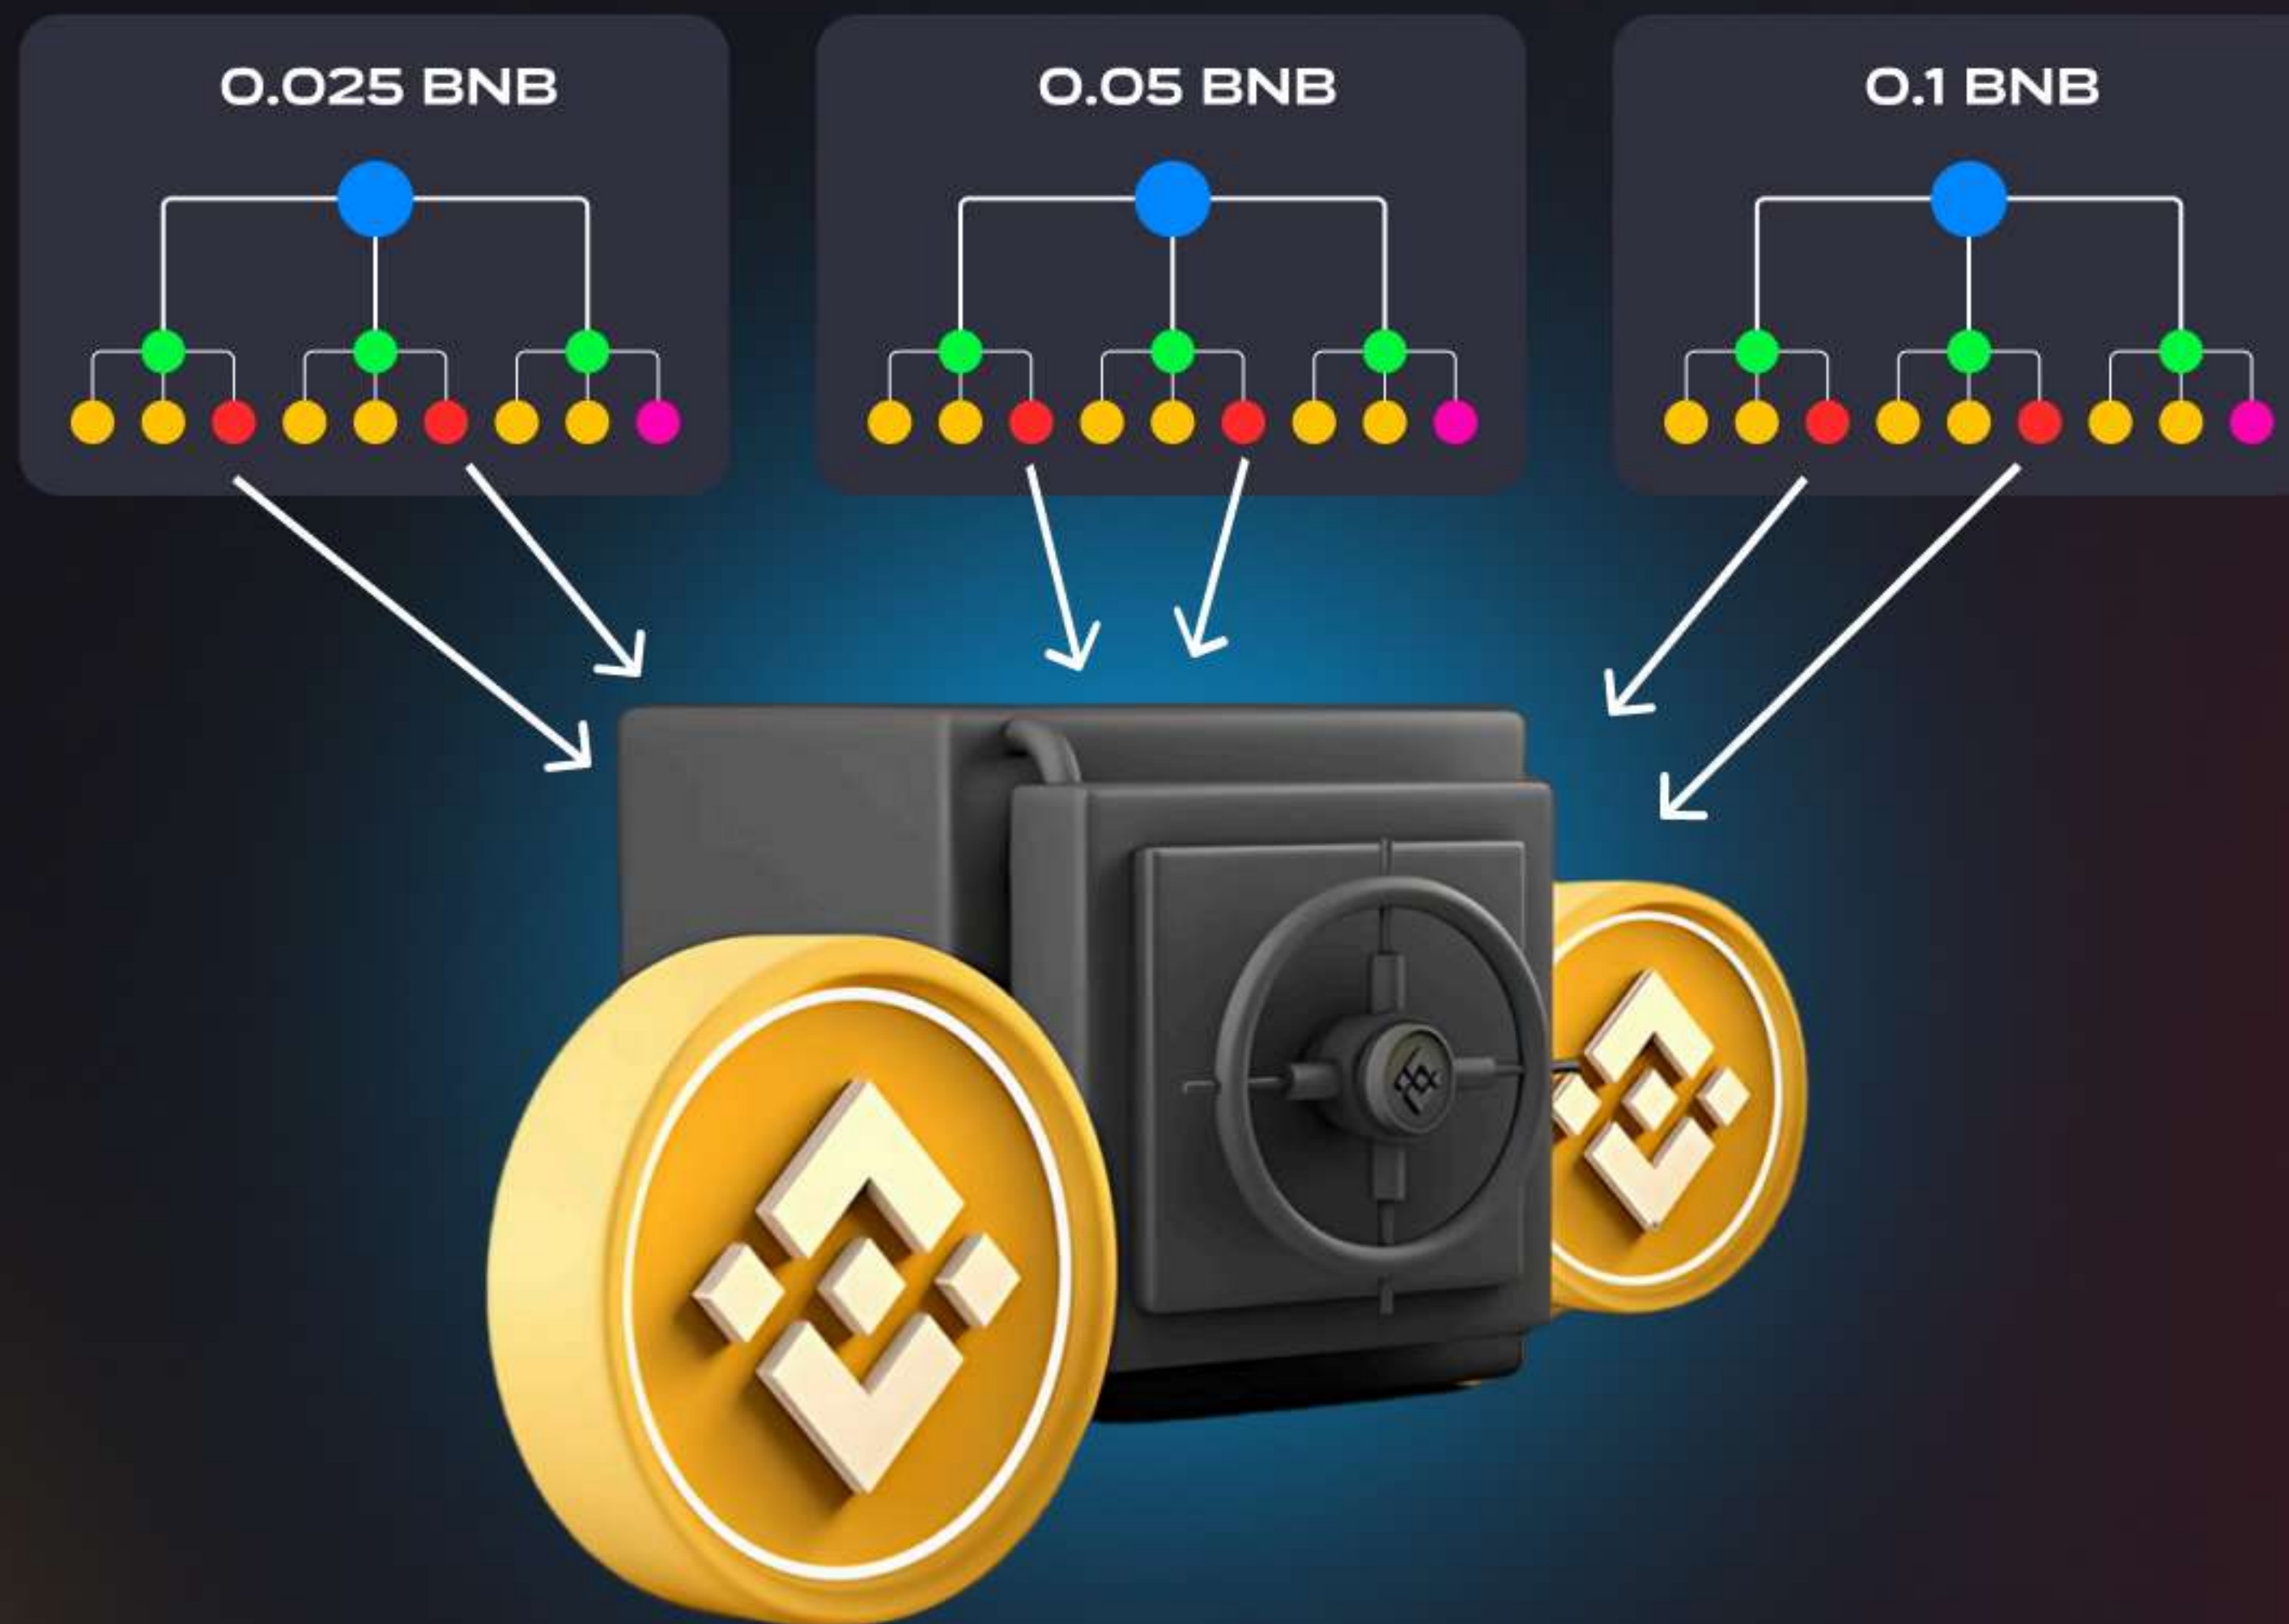

You can activate from 1 to 6 slots immediately using your own capital.
From the 7th to the 12th slot, you can only activate by using income from your pool wallet.
2 out of the 12 positions are credited to your pool balance, which can only be used for purchasing additional slots.

X9 MATRIX INCOME

In this slot structure, there are a total of 12 positions. Of these, the income from the first 3 positions is credited to the upline position above you. The income from the 4th and 5th positions is credited to your personal income balance, while funds from the 6th position are credited to the pool balance. The income from the 7th and 8th positions is again credited to your personal balance, and the income from the 9th position is credited to the pool balance. Funds from the 10th and 11th positions are also credited to your personal balance. The 12th position is credited to the upline balance above you, and the entire structure resets after the cycle is complete, allowing you to continue earning over and over again.

X9 MATRIX POOL WALLET

All pool income will go towards your pool wallet, from which you can upgrade or purchase the next slot. If you have already purchased the next slot, the income will continue to be deposited there to help you buy the new slot.

X9

MATRIXPOOL INCOME

Income from the pool is credited to your pool wallet, and these funds can only be used to purchase subsequent slots. If you have already purchased the next slot, the income will continue to be credited there to help you activate a new slot. Once you have activated all slots from 0.025 BNB to 51.2 BNB in the X9 Matrix, the accumulated funds in the pool wallet will be distributed daily among the users on 24 hours basis, who have activated the 51.2 BNB slot.

X9 MATRIX INCOME

12-slot matrix income system that allows you to earn in cycles:

12

Each slot has its own cost
(ranging from 0.025 BNB to 51.2
BNB)

AUTOMATION

The system transitions to new
cycles after the previous ones
are completed

RECYCLING

The structure is refreshed after
the cycle is completed, allowing
you to continue earning

How to start:

Buy BNB, connect your wallet, activate a package, fill in the slots in the matrix, attract participants, complete cycles, and use the Pool Wallet for an automatic transition to new cycles.
